SUMMER CAMP

JUNE 30 - JULY 25, 2025

Why Ivy Camps USA?

Join Ivy Camps USA at SPH Lippo Village for a summer of fun and learning! Our camps combine hands-on projects, exciting games, and interactive activities to make every day engaging. With a strong focus on skill-building, campers will develop teamwork, confidence, critical thinking, creativity, and more—all while making unforgettable memories.

Our instructors come from top US universities and are passionate about helping campers grow and learn in a supportive environment.

Join us this summer and discover a camp that feels like an extension of the education and care your family values.

Our Values & Priorities:

Foster a caring global community

Inspire curiosity and learning

Promote fearless experimenting

Value people and encourage diversity

Cultivate success through fun

Camp Learning Topics

Week 1: June 30 – July 4

TED Talks: Storytelling & Presenting

In this camp, students will learn the art of storytelling and how it can be applied to public speaking settings. Students will explore oral storytelling, learn how to design visually engaging slides/visuals for a presentation, methods to hook an audience in at the beginning of a speech and how to keep the audience entertained throughout a speech, and appropriate structures for talks. By the end of this camp, students will create and deliver a TED-style Talk, incorporating strategies learned during the course.

Week 2: July 7 – 11

Option 1: The Science of Motions & Machines

In this camp, students will learn about the science behind motion and machines, focusing on boats and planes. They will also be working to build working models of both boats and planes. Once they have built their working models, students will use knowledge to build and test their own plane and boat that will fly and float.

Option 2: Make & Market Your Own Chocolate Brand

In this camp, students will learn about chocolate through the lens of science, math, history, geography, design, business, and art. They will learn about the history of chocolate, how chocolate is made, and more. They will develop cooking and measuring skills and use their five senses to explore chocolate. Along the way, they will have fun doing hands-on experimentation in order to create their favorite chocolate. By the end of camp, students will create their own unique confection by developing a recipe, wrapper, branding, and of course, yummy treat for all to taste!

Week 3: July 14 – 18

Option 1: Making Decisions as a Leader

In this camp, students will discover how to use science, psychology, and economics to make smart decisions at school, in business, and in everyday life. Students will play a range of games to explore strategies that help them make sound decisions. Also, students will learn factors that impact our decision-making and use testing and experimenting to learn from mistakes. By the end of class, students will use decision-making science to solve problems at different levels, and show off how they have become a decision-making expert!

Option 2: Engineer a Better World with Lego

In this camp, students will take their Lego skills and merge them with a deep understanding of urban planning to design an ideal city. They will learn basic concepts of city planning, sustainability, essential infrastructure and more. By the end of the camp, students will have built their own Lego city masterpiece that demonstrates a deep understanding of community needs and their own creative expression.

Week 4: July 21 – 25

Build Your Own Business

In this camp, students will learn how to create their own business that solves a key problem that they identify in the world. They will go through the process of creating a business in this camp and, at the end of the camp, will produce a commercial for their business. Students will also learn all about how to create their own brand and analyze what makes other brands stand out in the world around them.
